CACI Nonsurgical Facelift **£**

The CACI Ultra treatment uses a microcurrent to lift and tighten the facial and neck muscles. By transmitting microcurrent impulses, it will re-educate the muscles to restore tone and elasticity. Results are visible after the very first treatment although a course is recommended for optimal long lasting results. CACI was first developed by Dr Thomas Wing to treat stroke and Bell's Palsy patients to lift the affected areas. The CACI treatment is backed by more than 20 years of medical research and is completely safe and painless.

Focus Dual® by Lynton - Lift | Firm | Tighten

Unrivalled results for non-surgical skin tightening. Why use HIFU?

As we age, our skin can start to lose elasticity and collagen, leading to sagging, wrinkles, and a loss of definition in the face. While surgical facelifts are one option for addressing these issues, they can be invasive and require a lengthy recovery period. That's where HIFU, also known as the "non-surgical facelift," comes in.

RF Microneedling

wrinkles & fine lines | acne & surgical scars | crepey neck skin
loose & sagging skin | stretch mark reduction | uneven skin tone
& texture | pigmentation | large pores | loss of facial volume

If you are disappointed when we cannot fit you in for a treatment, imagine how we feel when someone fails to turn up for their pre booked appointment or cancel with less than 24 hour notice. If only they had called to cancel you might have got your appointment.

To avoid 50% cancellation fee, please call us 24 hours or more if you need to cancel or amend your booking.
